Objective-C

Swift / Swift UI

SQLite / MySQL / Postgres

PHP

HTML / CSS

## HOBBIES

In my free time, I'm a commercial airplane pilot that enjoys doing volunteer medical flights for Angel Flight.

## PROFILE

Experienced engineering leader with a decade-long track record of communicating clearly, shipping great software, and building high-performance teams.

## EMPLOYMENT HISTORY

### Senior Engineering Manager, Apple

Cupertino

Apr 2013 — Present

- DRI (directly responsible individual) for the Notes app which serves nearly a billion users each month.
- First-level manager for the 10+ engineering team responsible for Notes.
- Second-level manager for (and founding member of) the five person team responsible for advancing the state-of-the-art of accessibility in our first-party apps.
- Highly visible role requiring frequent interaction and negotiation with Apple executives.
- Received consistently-positive reviews from leadership, directs, and peers.

### Engineering Director, Paramore Digital

Nashville

Apr 2010 — Apr 2013

- Technical lead for 7 iOS applications and over 20 web applications.
- Participated in client pitches and technical presentations.
- Designed and implemented automated devops infrastructure.
- Developed new ways of estimating projects which significantly improved company profitability.
- Led a successful company-wide transition to agile.

### Principal Engineer, DesignersMX

Nashville

Jan 2012 — Mar 2013

- Sole developer for a niche music curation service with nearly 1 million monthly visits.
- Implemented frontend single-page application before this sort of thing was cool.
- Implemented backend LAMP stack using the Laravel framework.
